

Favicon Creation and Implementation Checklist

Step	Task	Status
1	Prepare a simple square design (64x64 or 128x128 px).	[]
2	Save or convert the design to .ico format.	[]
3	Also prepare PNG (32x32, 64x64, 180x180, 192x192 px).	[]
4	Upload favicon.ico to the root directory of the site.	[]
5	Add <link rel='icon' href='/favicon.ico'> in the <head>.	[]
6	Add extra link tags for PNG and Apple Touch icons.	[]
7	Clear browser cache and reload site to test.	[]
8	Check site on desktop, mobile, and multiple browsers.	[]
9	For WordPress, use Customizer > Site Identity.	[]
10	Update only during brand redesign, keep filename favicon.ico.	[]
